

encyclopedia of medical astrology pdf

Medical astrology (traditionally known as iatromathematics) is an ancient medical system that associates various parts of the body, diseases, and drugs as under the influence of the sun, moon, and planets, along with the twelve astrological signs. Each of the astrological signs (along with the sun, moon, and planets) is associated with different parts of the human body.

Medical astrology - Wikipedia

An encyclopedia or encyclopædia is a reference work or compendium providing summaries of knowledge from either all branches or from a particular field or discipline. Encyclopedias are divided into articles or entries that are often arranged alphabetically by article name and sometimes by thematic categories. Encyclopedia entries are longer and more detailed than those in most dictionaries.

Encyclopedia - Wikipedia

Libra is an astrological sign, related to the constellation Libra, in the Southern Hemisphere near Scorpius and Virgo. In the tropical zodiac, the Sun meets Libra from September 23 to October 23, and in the sidereal zodiac, it ends on November 15. Libra, (The Scales of Balance), is the only symbol of the zodiac that is inanimate (it is not represented by an animal or person).
