Climate change is arguably the greatest challenge faced by humanity. Global greenhouse gas emissions from fossil fuel use continue to grow each year, despite attempts to limit them through mitigation and energy efficiency measures. The effectiveness of these measures has been largely offset by population growth and increasing uptake of more affordable electrical appliances.

Energy Code: Building technology in New York City has always evolved at a fast rate. Although New York State's energy code has been amended numerous times to keep pace, New York City requires change on a faster scale in order to reach PlaNYC greenhouse gas (GHG) emissions reduction goals. Under state law, a municipality's code must be equal or more stringent than the state energy code.

Mortgage Industry National Home Energy Rating Systems

An energy audit, or home-performance assessment, is the first step to see how a home uses energy. It is a comprehensive in-home energy evaluation conducted by a certified, third-party home performance specialist (HPS). It is used to find areas of concern and improve the efficiency, comfort and health of a home.

Energy Audit : Services : Kirloskar Brothers Limited

The potential opportunities for improving energy efficiency and lower CO 2 emissions in raw material generation and production of concrete are smaller than in cement manufacturing. For instance, CO 2 emissions during transport could be reduced by replacing diesel fuel with biodiesel. Normally, energy efficiency improvements proportionally reduce the emissions of CO 2 generated from fossil fuel ...

Energy Efficiency and Saving in the Cement Industry

The Low Income Home Energy Assistance Program (LIHEAP) is a United States federal social services program first established in 1981 and funded annually through Congressional appropriations. The mission of LIHEAP is to assist low income households, particularly those with the lowest incomes that pay a high proportion of household income for home energy, primarily in meeting their immediate home ...
