### **Talk about your list with your partner. - KIZCLUB**

Color additives reinforce the colors already present in the food and ensure uniformity of the food from season to season and batch to batch. They also add color to "virtually colorless foods," such as red raspberry sherbet and provide a dramatic color to "fun foods," such as candies and holiday treats.

Color and the appeal of various foods is also closely related. Just the sight of food fires neurons in the hypothalamus. Subjects presented food to eat in the dark reported a critically missing element for enjoying any cuisine: the appearance of food. For the sighted, the eyes are the first place that must be convinced before a food is even tried.

#### Color & Appetite Matters

Food ingredients have been used for many years to preserve, flavor, blend, thicken and color foods, and have played an important role in reducing serious nutritional deficiencies among consumers.
