Aquaphobia or waterfright is a persistent and abnormal fear of water. Aquaphobia is a specific phobia that involves a level of fear of water that is beyond the patient's control or that may interfere with daily life. People suffer aquaphobia in many ways and may experience it even though they realize the water in an ocean, a river, or even a bathtub poses no imminent threat.

Aquaphobia - Wikipedia

Fear is a feeling induced by perceived danger or threat that occurs in certain types of organisms, which causes a change in metabolic and organ functions and ultimately a change in behavior, such as fleeing, hiding, or freezing from perceived traumatic events. Fear in human beings may occur in response to a specific stimulus occurring in the present, or in anticipation or expectation of a ...

A Web site to support the implementation of the Consumer Confidence Reports (CCR) and the public's access to drinking water quality reports.

Safe Drinking Water Act: Consumer Confidence Reports (CCR)

Vulnerability . If you carefully read the information on this webpage, you will learn that, although the fear of flying isn't really about the risks inherent in aviation, it is based in the uncomfortable awareness that life is fragile and vulnerable, and that none of us "much like the man in the fictitious opening story" has any real control over it, whether in the air or on the ground.
