

financial derivatives theory concepts pdf

Financial economics is the branch of economics characterized by a "concentration on monetary activities", in which "money of one type or another is likely to appear on both sides of a trade". Its concern is thus the interrelation of financial variables, such as prices, interest rates and shares, as opposed to those concerning the real economy. It has two main areas of focus: asset pricing and ...

Financial economics - Wikipedia

A financial transaction tax is a levy on a specific type of financial transaction for a particular purpose. The concept has been most commonly associated with the financial sector; it is not usually considered to include consumption taxes paid by consumers.. A transaction tax is not a levy on financial institutions per se; rather, it is charged only on the specific transactions that are ...
