SWI-Prolog manual

The Project Management Triangle (called also the Triple Constraint, Iron Triangle and "Project Triangle") is a model of the constraints of project management. While its origins are unclear, it has been used since at least the 1950s. It contends that: The quality of work is constrained by the project's budget, deadlines and scope (features).; The project manager can trade between constraints.

Note that by introducing a new constraint if necessary, we can always take the objective function to have no uncertainty. The goal of (2.1) is to compute minimum cost solutions x^* , among all those solutions which are feasible for all realizations of the disturbances u_i within U_i . If U_i is a singleton, then the corresponding constraint has no uncertainty.
