The State of Food Security and Nutrition in the World 2017

How to Feed the World in 2050 1. Introduction The sharp increases in food prices that occurred in global and national markets in recent years, and the resulting increases in the number of hungry and malnourished people, have sharpened the awareness of policy-makers and of the general public to the fragility of the global food system.

How to Feed the World in 2050 - Home | Food and

Food safety, nutrition and food security are inextricably linked. Unsafe food creates a vicious cycle of disease and malnutrition, particularly affecting infants, young children, elderly and the sick. Foodborne diseases impede socioeconomic development by straining health care systems and harming national economies, tourism and trade.
